

Exhaust Fan Kit

Brand: LUNOS

Product Code: Lunos RA 15-60

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: \$395.75

Short Description

The RA 15-60 is a quiet exhaust ventilation fan with a sound absorption set for installation in 6" Lunos tubes.

Description

LUNOS RA 15-60 is an super efficient and quiet exhaust fan with sound absorbing elements.

The LUNOS through-wall low voltage fan and sound absorbing set fit in the supplied 20" tube.

Operating as a system, the fans provide exhaust ventilation within a space without the need for duct-work and is installed directly in the exterior wall.

Particularly useful in crawl spaces.

It can be combined with e² HRV fans or the passive ALD-R 160 Fresh Air supply controller/damper.

The RA 15-60 delivers very quiet, constant and efficient ventilation exhaust flows between 9 and 35 CFM in bathrooms and single room spaces that require ventilation, but where heat recovery is not needed (mild climates) or desired (vacation houses).

- Ventilation rates: 9-18-35 CFM
- Specific fan efficiency: 0.17 – 0.2 Wh/m³ (0.29 (W/cfm)
- Filter: G3 (MERV 5) or optional pollen F5 (MERV 9-10)
- Includes one controller. Up to 4 RA's can be connected per each controller/transformer.

- Installation sleeve included – can be pre-installed in wall before insulating/during construction
- Creating a very quiet heat recovery ventilation system without the need for ducts and balancing, with exhaust fan efficiency that is second to none.

Dimensions:

- Fan Diameter: 150mm ~ 5.9"
- Recommended install length lengths
- 260mm ~ 10.2"
- 350mm ~ 13.7"
- 500mm ~ 19.7"
- Core bore: 160mm ~ 6.3"
